
ASO Project-Wide Naming and Creation Standard

Enterprise naming rules for Dataverse, Power Platform, Customer Insights, Foundry, Azure, SAP, HubSpot, views, fields, flows, variables, and connection references.

GitHub path: docs/standards/ASO_Project_Wide_Naming_and_Creation_Standard.md

Version 1.1 - public customer-ready split package - refined for readability and GitHub publishing

Safety note: this public reference pack must not contain tenant IDs, credentials, secrets, real customer data, private endpoints, or connection strings.

Project-wide naming and creation standard

This is the ASO naming and creation contract. It is written for makers, architects, developers, testers, and operators before they create Dataverse schema, solution assets, flows, views, journeys, Azure resources, agents, API routes, or GitHub files.

Golden rule: schema names are not cosmetic. They become technical contracts across Dataverse, flows, integrations, tests, dashboards, and documentation.

Universal naming principles

Rule	Standard	Example
Publisher prefix	Use exactly one project-owned publisher prefix for all Dataverse custom components.	aso
Language	Use English technical names even where the user interface is localized.	Communication State
Schema permanence	Review schema names before creation; treat them as immutable technical contracts.	aso_foundryreviewrequired
No random prefixes	Never use new_, personal prefixes, or mixed prefixes.	Reject new_aiagentstatus
Environment-independent names	Do not put environment names inside Dataverse schema, flows, or CI journey keys unless the asset is environment-specific by design.	Use environment variables instead of DevFoundryUrl
Acronyms	Use approved acronyms only: ASO, AI, API, APIM, SAP, CIJ, ERP, CRM.	Do not invent MSFND or CIS
Searchability	Start operational names with the area or audience so lists group naturally.	ASO - Lead - Dispatch to Foundry
Business clarity	Display names should be readable; schema names should be stable and unambiguous.	Display: AI SAP Match Flag; schema: aso_aisapmatchflag

Naming style by component family

Component family	Pattern	Example	Why
Solutions	ASO.<Layer>	ASO.Core, ASO.Automation, ASO.Operations	Groups components by ownership and lifecycle.
Dataverse custom tables	Display: singular business noun; schema: aso_<singularcompactnoun>	Agent Run Log / aso_agentrunlog	Stable table contract for integrations, logs, and ALM.
Dataverse columns	Display: business label; schema: aso_<lowercasecompactmeaning>	Foundry Review Required / aso_foundryreviewrequired	Avoids casing drift and later flow mapping mistakes.
Global choices	aso_<Concept> using PascalCase concept	aso_AIStatus	Reusable vocabulary across tables.
Environment variables	aso_<PascalCaseSettingName>	aso_FoundryOrchestratorUrl	Clear configuration contract consumed by flows and deployment settings.
Connection references	ASO <Connector/Purpose> Connection Reference	ASO Dataverse Connection Reference	Readable in solution-aware flow editing and import settings.
Views	<EntityPlural> - <Purpose> or <Audience> - <EntityPlural> - <Filter>	Leads - AI Review Required	Supports user adoption and avoids duplicate vague views.

Component family	Pattern	Example	Why
Forms / tabs / sections	Business Title Case	AI & Orchestration, SAP Context	User-facing navigation clarity.
Flows	ASO - <Entity/Area> - <Trigger/Intent> - <Outcome>	ASO - Lead - Dispatch to Foundry	Operational traceability and support triage.
Customer Insights journeys	JRNY - ASO - <Lifecycle> - v<major>	JRNY - ASO - Lead Nurture - v1	Release-aware journey catalogue.
Azure resources	<type>-<workload>-<purpose?>-<env>-<region>-<###>	func-aso-sap-dev-weu-001	Aligns with cloud resource naming best practices.
API routes	Lowercase kebab path with version	/aso/sap/v1/customer-profile	Stable API contract with version boundary.
Foundry code files	lower_snake_case	risk_competitor.py	Repository readability and code convention alignment.
JSON contract fields	lower_snake_case	correlation_id, requires_human_review	Language-neutral API payload readability.

Field naming by data type

Data type	Display name rule	Schema name rule	ASO example	Do not use
Text identifier	End display name with ID for external IDs; schema ends with id.	aso_<system><entity>id	SAP Customer ID / aso_sapcustomerid	aso_sap_customer_id, SAPidText
Business text	Use a clear business noun.	aso_<businessmeaning>	HubSpot Source / aso_hubspotsource	aso_text1, aso_notes2
Multiline text	Use Summary, Rationale, Reason, Payload, Message, or Guidance.	aso_<concept><purpose>	AI Qualification Rationale / aso_aiqualificationrationale	aso_bigtext, aso_comments
Whole number	Use Score, Count, Days, Retry Count, or business numeric meaning.	aso_<concept><numericmeaning>	AI Lead Score / aso_aileadscore	aso_number1
Decimal	Use for confidence, probability-like values, or measured decimals.	aso_<concept>	AI Confidence / aso_aiconfidence	aso_decimalvalue
Currency	Use Amount, Revenue, Value, or local business term.	aso_<concept>amount	Approved Commercial Amount / aso_approvedcommercialamount	aso_money1
Yes/No	Use positive boolean wording: Required, Enabled, Allowed, Blocked, Called, Eligible, Approved, Match Flag.	aso_<concept><booleanmeaning>	Foundry Review Required / aso_foundryreviewrequired	Negative names like NotReady; ambiguous names like Flag1
Choice - status	Use Status only for lifecycle/process state.	aso_<concept>status	AI Agent Status / aso_aiaгентstatus	Using Status for category or type
Choice - stage	Use Stage for lifecycle phase.	aso_<concept>stage	Lifecycle Communication Stage / aso_lifecyclecommunicationstage	Level when it is really a lifecycle stage
Choice - type	Use Type for classification.	aso_<concept>type	Last Interaction Type / aso_customerinsightslastinteractiontype	Category without defined taxonomy
Date/time	Use On for event timestamps and Last <event> On for recent activity.	aso_<event>on	AI Last Run On / aso_ailastrunon	Date1, RunDateTime
Lookup	Use target table business noun; avoid ID in display.	aso_<targetnoun>	Opportunity lookup on Pending Commercial Action	Opportunity ID for lookup display
URL	Use URL in display; Url in environment variable schema names.	aso_<PascalCase>Url for env vars	APIM Base URL / aso_ApimBaseUrl	aso_APIMBaseURL

Yes/No naming rules

Yes/No fields must read naturally as true/false statements. Avoid negative booleans and vague labels.

Business meaning	Good display name	Good schema name	Default	Reason
Human review gate	Foundry Review Required	aso_foundryreviewrequired	No	Positive wording; true means review is required.
SAP match signal	AI SAP Match Flag	aso_aisapmatchflag	No	True means likely SAP match exists.
Feature toggle for SAP reads	Feature Flag - SAP Reads	aso_FeatureFlagSapReads	Yes in trial	True means read-only SAP context may be used through APIM/Functions when implemented.
ERP submit safety toggle	Feature Flag - ERP Submit	aso_FeatureFlagErpSubmit	No	True would allow write-path behavior only after integration, approval, idempotency, telemetry, and tests.

Environment variable contract

Display name	Schema name	Type	Trial value	Purpose
Foundry Orchestrator URL	aso_FoundryOrchestratorUrl	Text	TBD-FOR-PHASE-6	Future Foundry parent orchestrator endpoint.
Foundry API Audience	aso_FoundryApiAudience	Text	TBD-FOR-PHASE-6	Future Entra ID audience/app ID URI for Foundry calls.
APIM Base URL	aso_ApimBaseUrl	Text	TBD-FOR-PHASE-4	Future APIM base URL for SAP wrapper access.
SAP Wrapper Version	aso_SapWrapperVersion	Text	v1	Version of SAP wrapper API contract.
Customer Insights Compliance Profile	aso_ComplianceProfileName	Text	Global Commercial	Compliance profile used by future CI journeys.
Lead Journey Key	aso_LeadJourneyKey	Text	lead_nurture_v1	Future lead nurture journey key.
Qualified Lead Journey Key	aso_QualifiedLeadJourneyKey	Text	qualified_lead_v1	Future qualified lead journey key.
Opportunity Journey Key	aso_OpportunityJourneyKey	Text	opportunity_progression_v1	Future opportunity progression journey key.
Quote Proposal Journey Key	aso_QuoteProposalJourneyKey	Text	quote_proposal_v1	Future quote/proposal journey key.
Order Journey Key	aso_OrderJourneyKey	Text	order_confirmation_v1	Future order confirmation journey key.
Onboarding Journey Key	aso_OnboardingJourneyKey	Text	onboarding_v1	Future onboarding journey key.
Retention Journey Key	aso_RetentionJourneyKey	Text	retention_v1	Future retention journey key.
Expansion Journey Key	aso_ExpansionJourneyKey	Text	expansion_v1	Future expansion journey key.
HubSpot Sync Mode	aso_HubSpotSyncMode	Text	IngressOnly	HubSpot remains lead/contact ingress only and implemented last.
Feature Flag - SAP Reads	aso_FeatureFlagSapReads	Yes/No	Yes	Allows future read-only SAP context through APIM/Functions when implemented.
Feature Flag - ERP Submit	aso_FeatureFlagErpSubmit	Yes/No	No	ERP submit/write inactive until approval, APIM/Functions, idempotency, telemetry, and tests are complete.

Connection reference contract

Connection reference	Connector	Create in Phase 1?	Rule
ASO Dataverse Connection Reference	Microsoft Dataverse	Yes	Used by solution-aware flows for Dataverse read/write.
ASO Approvals Connection Reference	Approvals	Yes if available	Used later for commercial approvals.
ASO Foundry HTTP Entra Connection Reference	HTTP with Microsoft Entra ID or custom connector	Defer until real endpoint/audience exists	Never hardcode Foundry endpoint or secret.
ASO APIM HTTP Entra Connection Reference	HTTP with Microsoft Entra ID or custom connector	Defer until real endpoint/audience exists	SAP access only through APIM + Functions.
ASO Teams Alerts Connection Reference	Microsoft Teams	Optional	Internal operational alerts only.
ASO Outlook Internal Notification Connection Reference	Office 365 Outlook	Optional	Internal notifications only; never customer lifecycle sends.

View naming categories

View name	Entity	Purpose
Sales Rep - Leads - AI Review Required	Lead	Seller queue for leads requiring human review.
Sales Rep - Leads - Customer Insights Eligible	Lead	Leads eligible for CIJ lifecycle communication.
Sales Manager - Opportunities - High Risk	Opportunity	Coaching queue for high-risk opportunities.
Sales Manager - Opportunities - Proposal Journey Eligible	Opportunity	Opportunities ready for proposal journey.
AI Ops - Agent Run Logs - Failed Last 24 Hours	Agent Run Log	Incident triage.
AI Ops - Agent Run Logs - Needs Review	Agent Run Log	Review cases from Foundry/sales-agent conflict.
Integration - External Sync Ledger - Failed Sync	External Sync Ledger	Failed external sync operations.
Integration - Pending Commercial Actions - Awaiting Approval	Pending Commercial Action	Approval queue.
Journey Ops - Participation Ledger - Failed or Error	Journey Participation Ledger	CIJ journey issue triage.
Data Quality - Leads - Missing Consent Status	Lead	Consent normalization cleanup.
Data Quality - Accounts - Missing SAP Customer ID	Account	SAP reference cleanup.

Creation anti-patterns

Anti-pattern	Why it is wrong	Correct approach
new_ prefix	Wrong publisher; makes project-owned assets difficult to identify.	Use aso prefix through the ASO publisher.
aso_aso_ double prefix	Caused by typing the prefix twice; breaks schema contract.	Enter only the part after aso_ when the UI already shows the prefix box.

Anti-pattern	Why it is wrong	Correct approach
APIMBaseUrl / SAPWrapperVersion acronym drift	Inconsistent casing causes documentation and flow mapping errors.	Use ApimBaseUrl and SapWrapperVersion in environment variable schema names.
Customer Email Connection	Implies Outlook/Power Automate customer lifecycle sends.	Use Customer Insights - Journeys for lifecycle sends; Outlook only for internal notifications.
SAP Direct Connection	Violates architecture boundary.	Use APIM + Azure Functions only.
Views called My View, Test, Old	Unclear owner and action.	Use Audience - Entity - Filter/Action pattern.
